Structural Foreman

Description

SUCCESSFUL CANDIDATE MUST HAVE MULTI-RES / APARTMENT EXPERIENCE

About the role

Franklin Smith has landed an opportunity with a well-established family-owned construction company based in Brisbane. They are seeking an enthusiastic and dedicated Site Foreman to be an integral part of a wide range of projects in the region.

The successful candidate will be joining a close-knit group of hardworking team members. This is a permanent and full-time position that offers a competitive package.

Company Description

- A family-owned multi-residential and commercial construction company with over 60 years industry experience
- D&C residential/commercial construction company specialising in high end apartments
- A company that prides on their team of fully-qualified industry professionals that can provide a complete end-to-end service for a variety of building services to a vast client base

Work Environment

A well-established business known for their building expertise and solid history in the industry. The business prides itself on having an incredibly talented and dedicated team and aims to provide a wide variety of career progression and continuously encourages their people to work on interesting projects.

Responsibilities

- Understand the scope, contract and project time frames
- Managing contractors to ensure they are fulfilling their roles and responsibilities
- Ensure OHS and environmental procedures are observed, practiced, and provide report on incidences/accidents
- Assisting the Site Manager in the commissioning and handover of the project
- Ensure all relevant documentation is completed and provided to the Project Manager
- Ensure the project meets its required performance targets in relation to budget
- Manage defects on a daily basis and close out before the end of the project
- Liaise with Clients, Stakeholders and Consultants on site
